

- Pedestrian and Cycle Routes
- Tertiary Nature Trails (Hoggin Tracks)
- Boardwalks
- Observations Points
- Bird Hides/Towers
- Recreational spaces with informal open space, wildflower meadow and picnic spots
- Opportunities to extend the inter-tidal zone at low lying areas along shoreline through managed retreat (moving the flood defence inland).
- Opportunities to create enhanced salt marsh through managed retreat to flood defence wall.
- New Constructed reedbed area and northern channel to Broadness harbour to provide filtering and water treatment function.
- Existing marshland areas to be enhanced through sensitive management to extend/enhance marsh habitats with new watercourses/waterbodies/permanently wet areas.
- Area identified for creation of enhanced scrub habitats through new planting and improved management regime.
- Resort arrival landscape - opportunities for tree planting, parkland, wildflower planting and innovative SUDS such as raingardens.
- Opportunity for rain garden tree pits and high impact directional avenue tree planting.
