

The London Resort Development Consent Order Environmental Impact Assessment Preliminary Environmental Information Report – Volume 1: Main Report

July 2020

Planning Act 2008

The Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009

Regulation 5(2)(a)

The Infrastructure Planning (Environmental Impact Assessment) Regulations 2017

Regulation 12(1)

Reference: BC080001

EIA PEIR: Volume 1 ♦ contents

1.	Introduction	1-1 to 1-9
	➤ Overview ➤ Project Status ➤ Environmental Impact Assessment and the ‘Rochdale Envelope’ ➤ EIA Scoping ➤ Purpose of this report ➤ The applicant and project team • Table 1.1: EIA project team ➤ Report Structure ➤ Your comments	
2.	Relevant law and regulations	2-1 to 2-7
	➤ Introduction ➤ Infrastructure Planning ➤ Other relevant provisions	
3.	National and local planning policy	3-1 to 3-11
	➤ Introduction ➤ National policy ➤ Local Policy • Table 3.1: Summary of planning policy and development and management responsibilities • Table 3.2: Summary of development plan and other planning policy	
4.	Alternatives sites and project evolution	4-1 to 4-14
	➤ Introduction ➤ Area of search ➤ Site selection criteria ➤ Evaluation of locational options • Table 4.1: Summary of the site options evaluation undertaken by LRCH in 2011-12 ➤ Evaluation of development layout options ➤ Evaluation of access options • Table 4.2 Design considerations raised by eastern and western route options for the Resort access road through the Ebbsfleet valley	

➤ Conclusion

5. Site and project description 5-1 to 5-21

- Introduction
- Site context
- The project sites
- Project description
 - Table 5.1: Preliminary estimates of the main component land areas and building footprints

6. EIA scope and general methodology 6-1 to 6-9

- Introduction
- The scope of the EIA
- Assessment methodology
 - Table 6.1: The measurement of environmental effects – receptor sensitivity
 - Table 6.2: The measurement of environmental effects – magnitude of impact
 - Table 6.3: The measurement of environmental effects – significance of effect
- In-combination and cumulative effects
- Transboundary effects
- Environmental statement structure and contents
 - The proposed structure of the London Resort Environmental Statement Volume 1 (main text)

7. Land use and socio-economics 7-1 to 7-123

- Introduction
- Relevant law, policy and guidance
 - Table 7.1: Relevant policy summaries by theme
 - Table 7.3: Potential socio-economic effects and receptors
 - Table 7.5: Study area by effect
 - Table 7.6: The London Resort indicative timescales
 - Table 7.7: Assessment years for socio-economic effects
 - Table 7.8: Data sources used to inform the economic assessment
 - Table 7.9: Broad definitions of sensitivity levels for socio-economic receptors
 - Table 7.10: Effect significance matrix
- Baseline conditions
 - Table 7.11: Available and affordable bed spaces within the CSA
 - Table 7.12: Definitions of sensitivity levels of community uses, open spaces, PROW's and routes
 - Table 7.13: Provisional sensitivity of PROW's and routes within the PSB

- Table 7.14: Project population for key assessment years and cumulative growth form 2018
- Table 7.15: Estimated proportion of trips to Kent Project Site by travel time band and mode
- Table 7.16: Do nothing employment projections by assessment year
- Table 7.17: Dwelling stock by tenure, 2018
- Table 7.18: Summary of key homelessness statistics in the CSA
- Table 7.19: Summary of five year deliverable dwellings and requirements in the CSA
- Table 7.20: Rooms and occupancy in the CSA
- Table 7.21: Global (top 25) theme park provision per million population and tourism arrivals
- Table 7.22: Top attractions in England
- Table 7.23: Retail floorspace
- Table 7.24: CSA additional retail floorspace (sq.m.) by 2026
- Table 7.25: Summary of receptor sensitivities
- Potential significant environmental effects of the proposals
 - Table 7.26: On-site and offsite construction employment supported by London Resort
 - Table 7.27: PROW and routes impacts
 - Table 7.28: London Resort: direct jobs
 - Table 7.29: Proportions of jobs
 - Table 7.30: Displacement, leakage and multiplier assumptions by scenario
 - Table 7.31: Net additional jobs by year and scenario, national level
 - Table 7.32: Net additional jobs by year and scenario, LCA level
 - Table 7.33: Jobs created by local authority and year and season
 - Table 7.34: DLP trip purposes by home origin
 - Table 7.35: Overnight stay preferences by broad area
 - Table 7.36: Average spending per trip by category
 - Table 7.37: Visitor and worked expenditure estimates in the CSA
 - Table 7.38: London Resort: summary of preliminary socio-economic effects
- Proposed additional mitigation
- Residual environmental effects
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions
- Next steps

8. Human health

8-1 to 8-85

- Introduction
- Methodology and data sources
 - Table 8.1: Receptor populations
 - Table 8.2: Potential health effects and receptors

- Table 8.3: Geographical study area
- Table 8.4: Study area by effect
- Table 8.5: The London Resort indicative timescales
- Table 8.6: Assessment years for health effects
- Table 8.7: Data sources used to inform the health impact assessment
- Table 8.8: Evaluation of the strength of evidence – ratings
- Table 8.9: Effect significance matrix
- Relevant law, policy and guidance
 - Table 8.10: Legislation relevant for the HIA
 - Table 8.11: National planning policy
- Baseline conditions
 - Table 8.12: Vulnerable populations in the study areas
 - Table 8.13: Self-reported health in the study areas
 - Table 8.14: Deprivation in the study areas
 - Table 8.15: Summary of receptor sensitivities
- Potential significant environmental effects of the proposals
 - Table 8.16: The London Resort: summary of preliminary health effects
- Proposed mitigation
- Residual environmental effects
- Cumulative and in-combination effects
- Summary and conclusions
- Next steps

9. Transport, accessibility and movement

9-1 to 9-77

- Introduction
- Relevant law, policy and guidance
- Methodology and data sources
 - Table 9.1: Significance of effects and magnitude of impacts based upon receptor value
- Baseline conditions
 - Table 9.2: Passenger and freight services
 - Table 9.3: Ebbsfleet International railway services
 - Table 9.4: Eurostar service frequency serving Ebbsfleet International per day
 - Table 9.5: Domestic routes serving Ebbsfleet International per day
 - Table 9.6: Northfleet station routes
 - Table 9.7: Swanscombe station routes
 - Table 9.8: Tilbury Town Station routes
 - Table 9.9: Rail passenger capacity on the busiest one hour in the morning
- Potential significant environmental effects of the proposals
- Residual and in-combination effects
- Climate change
- Summary and conclusions

10. River Transport**10-1 to 10-12**

- Introduction
- Relevant law, policy and guidance
 - Table 10.1: River Transport – Policy and Guidance
- Methodology and data sources
 - Table 10.2: Table of development that could affect safety and navigation
- Baseline conditions
- Potential significant environmental effects of the proposals
- Residual and in-combination effects
- Climate Change
- Summary and conclusions

11. Landscape and visual effects**11 -1 to 11 - 55**

- Introduction
- Methodology and data sources
 - Table 11.1: Planning Inspectorate's comments from EIA Scoping Opinion in relation to Landscape (December 2014)
 - Table 11.2: Level of effects matrix
- Consultation
- Relevant law, policy and guidance
 - Table 11.3: Summary of Landscape and Visual Amenity Relevant Policy
- Baseline conditions
 - Table 11.4: Proposed viewpoint locations
- Potential significant environmental effects of the proposals
 - Table 11.5: Summary of the distribution of habitats within the Project Site
 - Table 11.6: Potential construction effects on published landscape character
 - Table 11.7: Potential construction effects on visual receptors groups
 - Table 11.8: Potential effects on published landscape character at Year 1 of completion
 - Table 11.9: Potential effects at Year 1 of completion on visual receptor groups
- Proposed mitigation
- Residual environmental effects
 - Table 11.10: Potential effects on published landscape character at Year 15 of completion
 - Table 11.11: Potential effects at Year 15 of completion on visual receptor groups
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions

12. Terrestrial and freshwater ecology and biodiversity**12-1 to 12-73**

- Introduction
- Methodology and data sources
 - Table 12.1: Planning Inspectorate's comments from the 2014 EIA Scoping Opinion in relation to Ecology (December 2014)
- Relevant law, policy and guidance
- Baseline conditions
 - Table 12.3: Summary of the distribution and value of habitats within the Project Site
 - Table 12.3: Important Ecological Features to be considered within the EclA
- Potential significant environmental effects of the proposals
- Proposed mitigation
- Residual environmental effects
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions
 - Table 12.3: Ecology Impact Assessment Summary

13. Marine ecology and biodiversity**13-1 to 13-77**

- Introduction
- Relevant law, policy and guidance
 - Table 13.1: A summary of legislation and conventions of relevance to the Proposed Development
 - Table 13.2: Summary of national and local policies of relevance to the London Resort
 - Table 13.3: A Summary of Guidance followed for the Proposed Development
- Consultation
- Methodology and data sources
 - Table 13.4: Likelihood of effect occurring and confidence in assessment
 - Table 13.5: Value criteria for marine ecology assessment
 - Table 13.6: Sensitivity criteria for marine ecology assessment
 - Table 13.7: Magnitude criteria for marine ecology assessment
 - Table 13.8: Matrix to guide determination of effect significance
- Data acquisition methodology
 - Table 13.9: Surveys carried out at both the Kent and Essex Project Sites in 2020
- Summary of the baseline
 - Table 13.10: Value of receptors expected to be potentially present within the Project Site area
- Potential significant environmental effects of the proposals
 - Table 13.11: Interactions matrix indicating the potential pathways of effect of impacts from the London Resort works on marine ecology receptors
- Preliminary assessment of potential effects

- Table 13.12 Typical Source Noise Levels for expected Construction Vessels
- Table 13.13: Proposed mortality, potential injury, temporary threshold shift, masking and behaviour criteria for fish
- Table 13.14: Non-impulsive noise: TTS and PTS onset thresholds for Very High Frequency cetaceans (VHF), High Frequency cetaceans (HF) and Phocid Carnivores in Water (PCW): SEL thresholds in dB re 1 μ Pa²s under water
- Table 13.15: Impulsive noise: TTS and PTS onset thresholds for Very High Frequency cetaceans (VHF), High Frequency cetaceans (HF) and Phocid Carnivores in Water (PCW): SEL thresholds in dB re 1 μ Pa²s under water and peak SPL thresholds in dB re 1 μ Pa under water.
- Proposed mitigation
- Residual environmental effects
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions

14. Cultural heritage and archaeology

14-1 to 14-88

- Introduction
- Relevant law, policy and guidance
- Methodology and data sources
 - Table 14.1: Importance / sensitivity of archaeological and cultural heritage receptors
 - Table 14.2: Assessment criteria for determining the magnitude of impact
 - Table 14.3: Significance of potential effects
- Baseline conditions
 - Table 14.4: Designated heritage assets within the Site and Study Areas
 - Table 14.5: Undesignated heritage assets (terrestrial) within the Kent Project Site (based on current evidence; 2020 HER search; excluding findspots)
 - Table 14.6: Undesignated Heritage Assets (terrestrial) within the Essex Project Site (based on current evidence; HER2020; excluding findspots)
 - Table 14.7: Undesignated Heritage Assets (marine) within the Project Sites (based on current evidence)
 - Table 14.8: Designated heritage assets scoped in for assessment (based on current evidence)
- Potential significant environmental effects of the proposals
- Proposed mitigation
- Residual environmental effects

15. Noise and vibration

15-1 to 15-52

- Introduction
- Methodology and data sources

- Table 15.1: Summary of 2014 EIA scoping opinion and response
- Table 15.2: Summary of construction scenarios for each assessment location, ('x' indicates scenario assessment has been conducted at this point in the drafting of the PEIR (July 2020).
- Table 15.3: Assumed plant noise levels during site earthworks
- Table 15.4: Assumed plant noise levels during site paving
- Table 15.5: Assumed plant noise levels during site piling
- Table 15.6: Summary of the guidance documents and standards used for predicting noise and vibration from potential noise sources
- Table 15.7: Threshold of significant effect at dwellings
- Table 15.8: Magnitude of impact from construction noise
- Table 15.9: Criteria for determining the magnitude of impact of vibration levels on humans (B5228:2009+A1:2014)
- Table 15.10: Transient vibration guide values for cosmetic damage
- Table 15.11: Criteria for determining magnitude of impact vibration levels on buildings (derived from BS 5228-2:2009)
- Table 15.12: Criteria for determining magnitude of impact of noise changes in the short term after completion of the Proposed Development (Source: DMRB)
- Table 15.13: Criteria for determining magnitude of impact of noise changes in the long term after completion of the Proposed Development (Source: DMRB)
- Table 15.14: Criteria for determining magnitude of impact noise levels (derived from BS 4142: 2014 +A1 2019)
- Table 15.15: External event music noise level guidance
- Table 15.16: Criteria for determining receptor sensitivity
- Table 15.17: Definition of criteria for determining effect magnitude
- Table 15.18: Summary of criteria to determine magnitude of noise or vibration impact
- Table 15.19: Noise impact significance matrix
- Table 15.20: Indoor and Outdoor noise level guidance criteria for dwellings
- Relevant law, policy and guidance
- Baseline conditions
- Potential significant environmental effects of the Proposed Development
- Proposed Mitigation
 - Table 15.21: Summary of construction mitigation measures
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions

16. Air quality

16-1 to 16-30

- Introduction
- Methodology and data sources
 - Table 16.1: Relevant advice in the 2014 scoping opinion and response

- Table 16.2: IAQM criteria for requiring an air quality assessment
- Table 16.3: Operational receptor sensitivity
- Table 16.4: Details of modelled ecological receptors
- Table 16.5: Air Quality objective for Nitrogen Dioxide PM₁₀ and PM_{2.5}.
- Table 16.6: IAQM air quality impact significance descriptors
- Baseline conditions
 - Table 16.7: Nearby diffusion tube monitoring results (2016-2018)
- Potential significant environmental effects of the proposal
 - Table 16.8: Predicted dust emission magnitude for construction activities
 - Table 16.9: Sensitivity of the surrounding area to construction dust impacts
 - Table 16.10: Risk of dust impacts
- Proposed mitigation
- Residual environmental effects
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions

17. Water resources and flood risk

17-1 to 17- 55

- Introduction
- Methodology and data sources
 - Table 17.1: 2014 Scoping opinion comment and response
 - Table 17.2: List of consultation undertaken relevant to water resources and flood risk
 - Table 17.3: Criteria for determining receptor sensitivity
 - Table 17.4: Criteria for determining effect magnitude
 - Table 17.5: Matrix for determining effect significance
- Relevant law, policy and guidance
- Baseline conditions
 - Table 17.6: WFD classification of the Middle River Thames (EA Catchment Data Explorer, accessed: 19/06/2020)
 - Table 17.7: Objectives for the River Thames (Middle) which must be achieved (EA Catchment Management tool. Accessed 30/06/20).
 - Table 17.8: Recommended climate change allowances for peak rainfall intensity
 - Table 17.9: Sea level allowance for each epoch in millimetres (mm) per year for the south east
 - Table 17.9: List of sensitive receptors and sensitivities
- Proposed mitigation
- Residual environmental effects
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions

18. Soils, hydrogeology and ground conditions**18-1 to 18-33**

- Introduction
- Methodology and data sources
 - Table 18.1: Planning Inspectorate's comments from the 2014 Scoping Opinion in relation to Soils, Hydrogeology and Ground Conditions with current responses (from 2020)
 - Table 18.2: Summary of consultee responses to 2014 Scoping Report
 - Table 18.3: Resources / receptors and potential effects
 - Table 18.4: Criteria for determining receptor sensitivity
 - Table 18.5: Criteria for determining effect magnitude
- Baseline conditions
 - Table 18.6: Summary of previous ground investigations (Zones 1 to 6)
 - Table 18.7: Summary of previous ground investigations (Zones 7 to 9)
 - Table 18.8: Summary of previous ground investigations (Essex Project Site)
- Potential significant environmental effects of the proposal
- Proposed mitigation
- Residual environmental effects
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions

19. Waste and materials**19-1 to 19-30**

- Introduction
- Methodology and data sources
 - Table 19.1: Summary of comments from the 2014 Scoping Opinion report relevant to waste for the Kent Project Site
 - Table 19.2: Criteria for determining waste receptor sensitivity (IEMA, 2020)
 - Table 19.3: Criteria for determining material receptor sensitivity (IEMA, 2020)
 - Table 19.4: Criteria for determining magnitude of impact for waste (IEMA, 2020)
 - Table 19.5: Criteria for determining magnitude of impact for materials (IEMA, 2020)
 - Table 19.6: Matrix for determining effect significance
- Relevant law, policy and guidance
- Baseline conditions
 - Table 19.7: Management of Kent CD&E waste in 2015 through permitted sites excluding hazardous waste (BPP, 2017)
 - Table 19.8: Kent operational waste facility capacities (KCC, 2012)
 - Table 19.9: Essex and Southend on Sea existing waste management capacity in 2015 (*ECC & SOSBC, 2017*)
 - Table 19.10: Management of C&I waste in Essex and Southend on Sea Area (2016).
 - Table 19.11: C&I waste produced in 2017 in Essex vs consented capacity (ECC,

2018).

- Table 19.12: Management of CD&E waste from Essex and Southend on Sea through permitted sites (tonnes) WDI, 2017.
- Table 19.13: CD&E waste produced in 2017 in Essex vs consented capacity (ECC, 2018)
- Table 19.14: Arisings, capacities and capacity gaps for Kent and Essex
- Table 19.15: Table 19.15: Spare landfill capacities of Kent and Essex (DEFRA, 2018)
- Table 19.16: Kent C&I future waste generation (higher growth range)
- Table 19.17: South East Plan C&I waste management routes
- Table 19.18: Kent management requirements for CD&E waste 2026-2031 (BPP, 2017)
- Table 19.19: Thurrock future waste generation
- Table 19.20: Thurrock future waste generation C&D upper and lower scenarios
- Table 19.21: Forecast C&I arisings to 2035 (000s) tonnes for Essex and Southend on Sea
- Table 19.22: Forecast CD&E waste arisings with 0.3% growth scenario to 2035 (000s) tonnes for Essex and Southend on Sea (BPP, 2015)
- Table 19.23: Identified waste receptors and their assumed sensitivity
- Potential significant environmental effects of the proposal
 - Table 19.25: Estimated CD&E waste quantities
 - Table 19.26: Estimated operational waste quantities
- Proposed mitigation
- Summary of residual effects
 - Table 19.27: Summary of likely residual effects during demolition and construction
 - Table 19.28: Summary of residual effects during operation
- Cumulative and in-combination effects
- Climate change
- Summary and conclusions

20. Greenhouse gas and climate change

20-1 to 20-28

- Introduction
- Relevant law, policy and guidance
 - Table 20.1: Table containing the key pieces of legislation relating to climate change
 - Table 20.2: Table detailing national policy relating to climate change
 - Table 20.3: Table detailing relevant regional policy relating to climate change
 - Table 20.4: Table detailing relevant local policy relating to climate change
 - Table 20.5: Table detailing guidance documents relevant to the inclusion of climate change in EIA
- Part A: Climate change mitigation
 - Table 20.6: Criteria for determining impact magnitude for construction stage embodied carbon (GHG emissions associated with lifecycle stage A1-A5 for product and construction)
 - Table 20.7: Criteria for determining magnitude for life cycle embodied carbon

(GHG emissions associated with life cycle stage B1-B5 in use, C1-C4 end-of-life and D beyond the life cycle)

- Table 20.8: Criteria for determining impact magnitude for GHG emissions associated with operational energy consumption (lifecycle stage B6)
- Table 20.9: Criteria for determining impact magnitude for GHG emissions associated with operational water consumption (lifecycle stage B7)
- Table 20.10: Impact significance matrix
- Table 20.11: Current baseline GHG emissions calculation
- Table 20.12: Summary of sensitivity, magnitude and significance ratings attributed to the identified construction phase effects
- Table 20.13: Summary of sensitivity, magnitude and significance ratings attributed to the identified operation phase effects
- Table 20.14: Construction phase supplementary mitigation opportunities
- Table 20.15: Operation phase supplementary mitigation opportunities
- Part B: Climate change adaptation and resilience
 - Table 20.16: Criteria used to determine likelihood
 - Table 20.17: Criteria used to determine consequence
 - Table 20.18: Risk rating determined based on the likelihood and consequence scores
 - Table 20.19: UKCP18 data for the South East of the UK under RCP 8.5
- Summary and conclusions
 - Table 20.20: Summary of sensitivity, magnitude and significance ratings attributed to the identified construction phase effects
 - Table 20.21: Summary of sensitivity, magnitude and significance ratings attributed to the identified operation phase effects
 - Table 20.22: Construction phase supplementary mitigation opportunities
 - Table 20.23: Operation phase supplementary mitigation opportunities
- Reference List

21. Cumulative effects

21 – 1 to 21 – 3

- Introduction
- Methodology

22. Conclusions

22 - 1 to 22 - 1
